

In our digital era, we are all members of a connected global society, rich in its cultural diversities, aspiring to live in peace and dignity on a preserved planet. In a near future, the consciousness of a common destiny on the same planet will generate in every country electoral majorities implementing ecologist and progressive solutions from local to global level.

## I JOIN THE GLOBAL MOBILIZATION v 3.0

*3.0 symbolizes a space of international public expression concerning common interest global issues.*

**I OPPOSE** this productivist globalization under corporate dominance that ill-treats people in every country and devastates the planet and its climates by the responsibility and to the benefit of a tiny minority.

**I SUPPORT** progressive and ecological solutions, locally as globally, to help ensure a future to humanity on a safe and preserved planet.

**I SIGN** on [globalsociety.org](https://globalsociety.org) and I join the MOBILIZATION v 3.0.

Together, we'll change course towards fair trade, new ways of producing and consuming and a qualitative growth respecting people and the environment.
